## PROFILE

Experienced Senior Software Engineer with 5 years of expertise. Proficient in React.js, I've successfully led end-to-end creation of diverse projects, including e-commerce platforms, machine maintenance software, and SaaS.

## EXPERIENCE

### Full Stack Developer at Instaleap, Cartagena

December 2022 — August 2023

- Create and maintain E-commerce Admin Application
- Follow Agile methodology to quickly develop new features.
- Define new features and create new tasks.
- I contributed to defining and developing new features and improvements to the UX/UI of their admin panel, reducing the number of support tickets and user requests for actions that couldn't be performed without the admin panel.
- I defined and developed a module that posed a scalability and performance challenge.
- Additionally, I played a key role in defining a clear and scalable solution for one of the company's challenges in its picking system, establishing the foundation for a system that will serve as a competitive advantage for the company.
- I used **React.js, Redux, Redux Toolkit, Jest, Testing-library, Node.js, AWS, Antd, and Jira**

### Full Stack Developer at Melt Studio, Cartagena

October 2021 — September 2022

- Define, develop, and maintain web applications.
- Mentoring, leading developers, and making technical decisions.
- I used React.js, Redux, Next.js, Redux Toolkit, Jest, Testing-library, Firebase, Node.js, GraphQL, **Material UI**, and **Pivotal Tracker**.

### Lead Full Stack web developer at Krones, Bogotá

July 2021 — October 2021

- Lead the definition, design, and development of the machine maintenance status monitoring platform for this company in Latin America.

### Lead Full Stack Software Engineer at Itseil, Cartagena

April 2020 — October 2021

- Lead the definition, design, and developing different projects.

### Freelance at Workana, Cartagena

April 2018 — April 2020

- Freelancer in Workana for 2 years. Defining, designing, and developing different projects.
